Career Overview

Senior Web Developer specializing in PHP, Drupal, SharePoint, JavaScript, Ajax, jQuery, and CSS with 10 years of experience creating and maintaining professional web applications. Key responsibilities have included project planning, system architecture and design, managing projects throughout their lifecycle, application/web development, user training and system administration. ITIL certified with government clearance level 3.

Technical Knowledge

Drupal 6,7,8, SharePoint 2010 & 2013, CSS3, HTML5, PHP, XML, FBML, MySQL, WordPress, C++, .NET, JQuery, JavaScript, Responsive Web Design, Apache, Application Development, ITIL, SASS, Bootstrap, Foundation, AJAX

Professional Work Experience (Full Time)

Web Content Administrator

ActionNet Inc. — Kings Point, NY

June 2012 to Current

Led out the redesigning and development for the USMMA internet and USMMA intranet sites, successfully increasing the page views from 150 to over 294000 a month. Sole designer for the Academy intranet

- Worked as part of a team to migrate existing internet site from MetaDot to Drupal 7. Work included custom Panels, Views, Blocks, content types, user permission levels, custom module development including Masquerade, importing of old site users and content. Set up online tutorials and taught users to use the CMS.
- Developed custom themes, applying them to Drupal using AJAX, HTML, CSS and JavaScript.
- Redesigned the Academy intranet site by creating templates within SharePoint 2010 and 2013.
- Evaluated the Academy's paper processes, determining which could be improved or eliminated through the development of .Net or AngularJS applications. Proceeded to create prototypes, wireframes, mockups, and time estimates regarding the scope of the projects. Tested sites providing test cases and scenarios.
- Upgraded and patched Apache servers, conducting security upgrades on IIS servers from Tripwire information.
- Through K-Box ticketing system handled requests to update the website and unlock user accounts.
- Created proposals, worked on project planning, estimating, requirements gathering, and architecture design.

Systems Programmer

Mediamark Research — New York, NY

September 2009 to April 2010

Logically framed and programed complex online questionnaires/surveys in Conformat tool or using a proprietary survey scripting language called vQSL.

- Developing the online questionnaires included creating data maps, setting filters and quotas, customized scripts, advanced logic implementation, managing languages, exporting and reporting. Produced custom online questionnaires using CSS, HTML, ASP, Flash, ActionScript and JavaScript.
- Efficiently communicated timelines to project managers detailing required resources and potential roadblocks to project deadlines.

Front End Web Developer

BMG Columbia House — Garden City, NY

October 2007 to July 2009

Web Developer responsible for making updates to the bmgmusic.com and yourmusic.com websites.

- From PSDs sent from Designers coded email advertisements and site pages using HTML, CSS, Perl, PHP, UNIX and JavaScript. Created an uploading tool in PHP that pulled in JSON data.

Freelance Experience

Worked as a contract Web Developer / Programmer for various public, private and large enterprise companies. Also setup my own company called "Web4Purpose" where I led and trained a small team of developers.

April 2012 to May 2012	Digitas Health - Delivering fully functional healthcare websites from mockups.
Jan 2012 to May 2012	Newsday — Updated the Newsday.com newsfeeds using JSON to sort data.
Dec. 2011 to Dec. 2011	Publicis Modem — Updated Sanofipasteur.com , created animated jQuery carousel.
Sept. 2011 to Nov. 2011	EuroHavas - Updated IBM web pages using a custom proprietary CMS.
Feb. 2011 to Aug. 2011	DraftFCB - Updated Pharmaceutical websites using JavaScript, PHP, CSS3, HTML5 and WordPress. Used Code Ignitor PHP framework to create print functionality for a site.
Jan. 2011 to Feb. 2011	Bluewolf — Used FBML to pull "friends" information from Facebook for BMW ad. Used PHP to add blogging functionality to WordPress sites. Created WordPress templates.
Nov. 2010 to Dec. 2010	Promantis - Updated Travelors.com adding JavaScript validation to forms, QA'd site.
Sept. 2010 to Sept. 2010	Fanfeeder - Updated Fanfeeder.com Facebook application adding jQuery animations.
June 2010 to Aug. 2010	InFoTek - Updated Oxygen.com by creating custom Drupal themes. Edited Modules.
Aug. 2007 to Nov. 2007	DotGlu — Used jQuery to create an animated chart for vertex.com . Created wireframes for a Sony sweepstakes site. Setup WordPress site using PHP to custom functionality.
June 2007 to Aug. 2007	National Urban League - Was sole designer/developer for the National Urban League 2007 Democratic convention website. It included Hillary Clinton and then Senator Barack Obama. The large scale web project that reached over 250,000 people. Setup Blogger pages for live conference updates. Updated nul.org using their custom CMS.

Personal Projects

- Set up an Acquia Cloud based Drupal site for evaluation. Installed Drupal 7 along with Apache, MySQL, MyPHPAdmin. Set up staging, development and production environments. Creating custom modules.
- Produced a PHP CMS for a small business client and used MySQL to set up the database.
- Created a web training program to teach youths ages (9 to 21) how to code and build web pages.
- The thesis project for my Master's degrees was to create a Plan to overhaul a fictional large company's software systems. Acted as the Project team leader, analyzing the current system, creating project timelines, distributing tasks and creating implementation plans while managing costs. Received an A for the project.
- Took a course in Java development, Parallel Programming, Visual Studio and two courses in Databasing.
